Summary

First-semester B.Tech Computer Science & Engineering student at Bennett University, building strong foundations in Data Structures & Algorithms (DSA) and programming. Unity game developer with hands-on experience building and publishing solo projects for Android and WebGL. Focused on strengthening problem-solving skills while continuing to build practical projects.

EDUCATION

Bennett University, Greater Noida
Bachelor of Technology (B.Tech) — Computer Science & Engineering
2026 – Present

Silver Oak Public School
Class 12th — Senior Secondary
2025

PROJECTS

Royal Run — Endless Runner | Unity, C#
Solo Developer
Built and published an endless runner for **Android and WebGL**.

- Designed **procedural level generation** with obstacles and collectibles.
- Implemented **mobile touch controls**, collision detection, and particle effects.
- Created an **apple & coin collection system** with scoring mechanics.

Rocket Boost — 3D Rocket Flight Game | Unity, C#
Solo Developer
Built a physics-based 3D rocket flight game.

- Implemented **physics-based thrust, rotation, and rocket controls**.
- Designed levels with **obstacles and landing platforms**.
- Added **collision detection and particle effects** for movement and interactions.

TECHNICAL SKILLS

Languages: Java, C#(Unity)
DSA: Arrays, Strings, Two Pointers, Basic Problem Solving
Game Development: Unity, 3D Game Development, Physics & Gameplay Programming
